## Viedoc EDC

Viedoc EDC helps users easily collect, validate, and report on clinical trial data. With our browser-based interface, you can capture and manage data with greater accuracy and efficiency. We've made our EDC software flexible, effortless, and dependable so you can focus on producing more accurate outcomes.

### Effortless

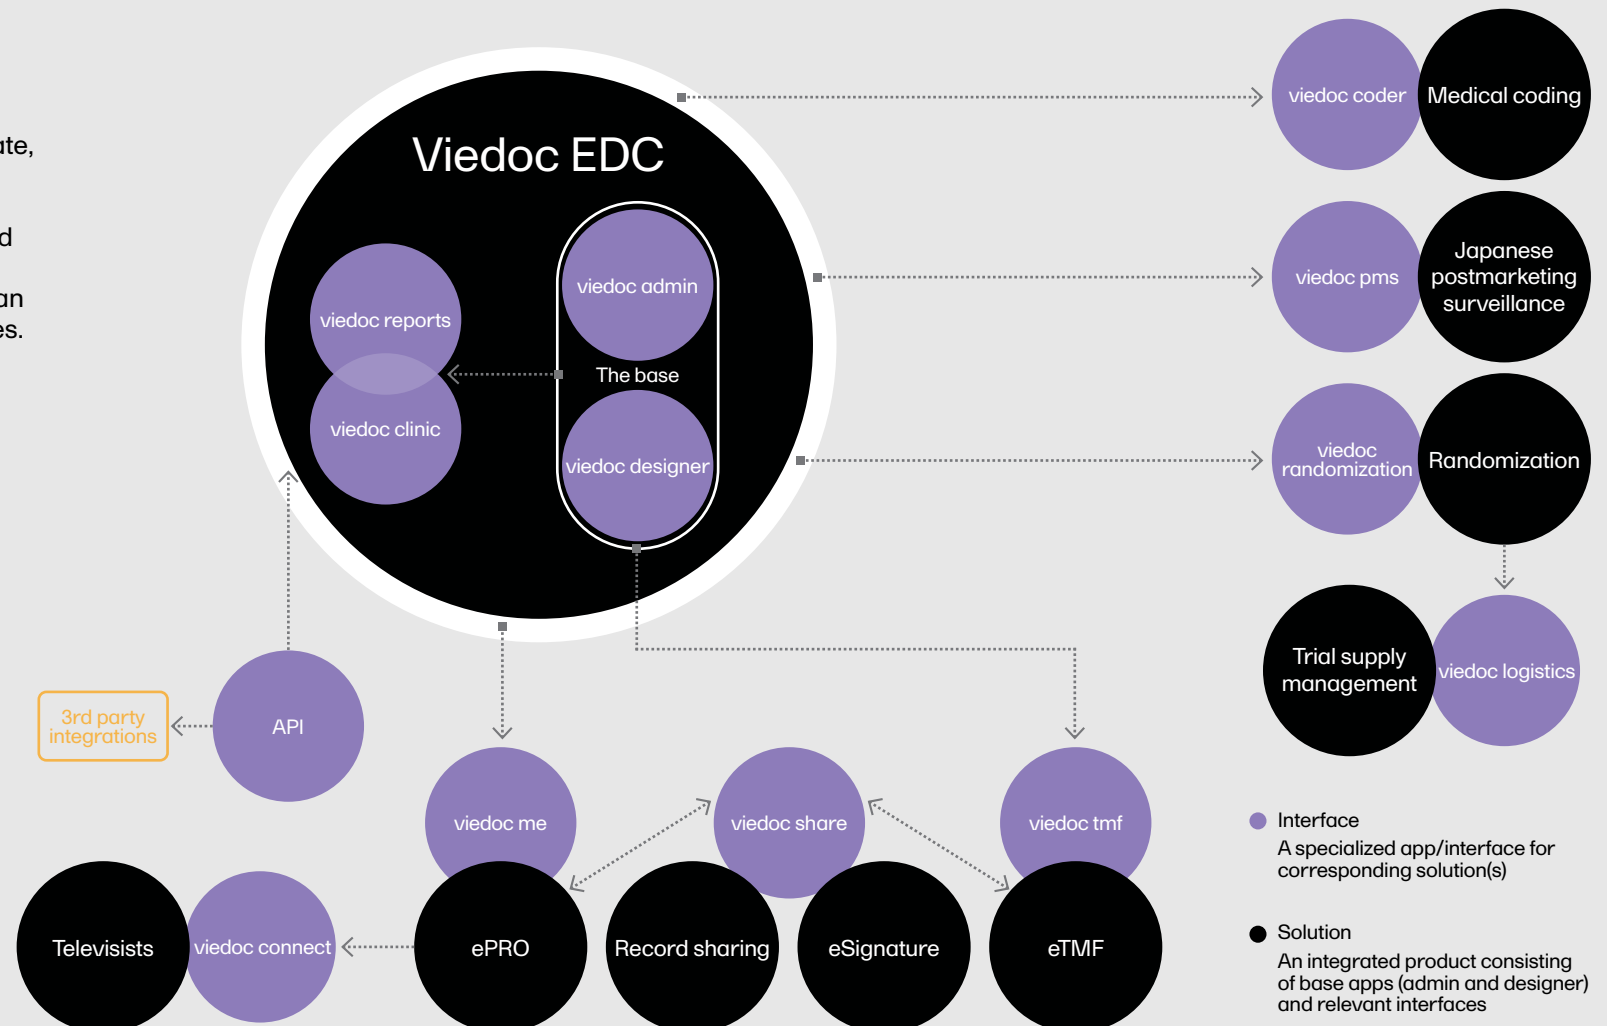

EDC system designed for the most effortless clinical trial operation.

### Dependable

Don't waste time worrying about security, safety or privacy concerns.

### Flexible

Customize the study setup as per your protocol.

## Viedoc portfolio at-a-glance

### ■ viedoc clinic™

An electronic Case Report Form (eCRF) tool that simplifies data capture for investigators and enables study teams to access, manage, and review clinical trial data efficiently.

### ■ viedoc designer™

A free-of-charge, fully integrated interface that allows study builders to create and adjust studies run in the Viedoc ecosystem.

### ■ viedoc admin™

A free-of-charge, browser-based application that enables easy, comprehensive setup and maintenance of clinical studies within the Viedoc eClinical suite.

### ■ viedoc reports™

An advanced, free-of-charge reporting tool fully integrated with our browser-based EDC platform.

### ■ API

Makes integrating 3rd party solutions with our platform straightforward and seamless, extending the capabilities of the Viedoc eClinical suite for a truly custom, robust study platform.

### ■ Randomization

Supports simple and complex randomizations, assignments based on a user-generated list, and advanced assignments based on algorithms.

### ■ Trial Supply Management

A capable and cost-effective solution designed to optimize workflows and secure inventory effortlessly.

### ■ Medical Coding

Saves time and resources thanks to advanced features like batch coding, support for major dictionaries, auto coding, and more.

### ■ ePRO

An electronic Patient-Reported Outcome solution enables data collection directly from study subjects.

### ■ Televisits

Allows a smooth and secure video interaction between study participants and investigators.

### ■ Record sharing

Enables our eClinical suite users to share study images, videos, reports, and any other study-related documents with authorized users.

### ■ eSignature

Streamlines the regulatory-compliant (21 CFR Part 11) collection and sharing of digital signatures.

### ■ eTMF

An electronic Trial Master File solution designed to allow secure, role-based access to all trial documentation 24/7.

### ■ PMS - Japan

A solution fulfilling the requirements for a Japanese Post Marketing Surveillance study – including booklet data collection and the Kaifu functionality.

## Professional Services

Viedoc's eClinical suite is designed to allow users to quickly and easily build, deploy, and manage clinical studies. To enhance your in-house capabilities, Viedoc Professional Services provides additional, on-demand resources and expertise that can help you get the most from your investment. We'll give your team the precise support needed, as needed—helping you focus on running an effective study.

### Certified Designer Training

Viedoc's comprehensive training prepares you to build, manage, and maintain your studies independently. Online modules enable designers to learn at their own pace yet become fully Viedoc certified in as little as 16 hours. Our certification program can quickly transform study designers from "users" to "experts."

### Technical Support

Ensure your clinical trials run smoothly with Viedoc's in-depth technical support. Our dedicated support team ensures in-house Viedoc Certified Designers can maintain and fine-tune their clinical studies for optimum performance. Viedoc's online help desk and worldwide, round-the-clock support is skilled, experienced, and ready to help you succeed.

### Study Build Service

Viedoc's expert designers and project managers can work side-by-side with your people to design highly effective, ready-to-run studies. We'll work with you throughout the study build process to meet each unique study protocol's requirements. We'll also assist if parameters change midway through the study, to keep you on track for success.

## About Viedoc

Viedoc designs innovative clinical trial software used globally by pharmaceutical, biotech, and medical device companies, as well as research institutions. Headquartered in Uppsala, Sweden, with offices worldwide, Viedoc has supported studies for over 1 million patients in 75+ countries. The Viedoc eClinical Suite offers cost-effective solutions for small to medium-sized studies, providing speed and compliance without sacrificing complexity through a secure, cloud-based platform.
